

ANNUAL *Max Extender*

Renaissance works hard to provide unprecedented levels of service and satisfaction for your clients, including developing unique solutions to solve your dental benefits needs. Our Annual Max Extender allows your clients to continue enjoying the many benefits of maintaining a healthy smile.

How It Works

Add the Diagnostic & Preventive (D&P) Annual Max Extender—for services such as cleanings and exams—and those services won't count toward the annual maximum, giving enrollees extra money to spend on other services and procedures that they may need.

Enrollees will be able to take advantage of a variety of services without compromising their annual maximum, including:

- Exams
- Cleanings
- Fluoride Treatments
- Diagnostic X-rays
- And More!

EXAMPLE:

Let's say a plan has a \$1000 annual maximum and includes two cleanings per year. The average annual cost for traditional diagnostic and preventive services is \$288.¹

2 exams + 2 cleanings + 1 set of X-Rays
\$82 **\$154** **\$52** = **\$288**

If these services counted toward a **\$1,000** annual max, only **\$712** would remain. However, the D&P Annual Max Extender means the full **\$1,000** annual maximum is still available for the year. It's like having an annual max of **\$1,288!**
